

How to connect to wireless internet

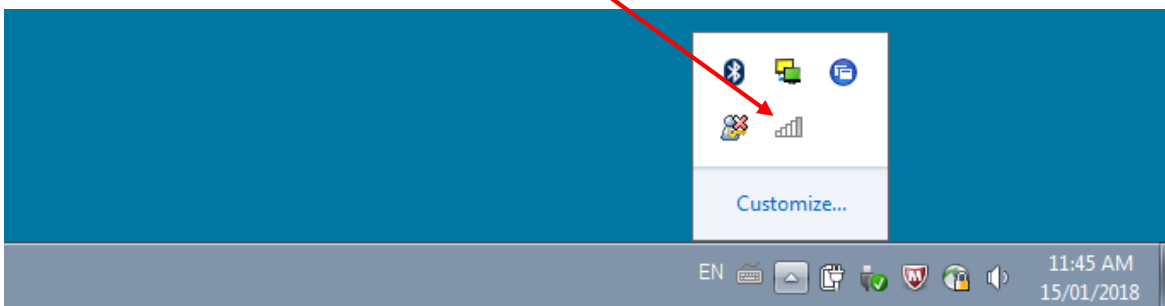

1. Look at the bottom right of the monitor screen. You should see this wireless network icon. Click on it.

If you don't see that icon, do not despair. It's just hidden. If you do not see it, click on this little up-arrow first.

There it is! Now click on the wireless network icon:

2. Next, click on the name of your wireless network, then select **Connect**:

3. Next, in the dialog box that shows up, type in your wireless password and click **OK**.
